

The LEADERSHIP ARCHITECT® Suite of Tools

Leadership & Talent Development

Product Certification 31 August – 1 September 2009

Invitation to register

Zuri Consulting Limited in partnership with Agility Consulting present this opportunity for you to join us for our workshop introducing The LEADERSHIP ARCHITECT® range of competency based tools issued through Lominger International.

This two day programme focuses on the LEADERSHIP ARCHITECT® Suite, including the Leadership Architect® sort cards, Leadership Architect® Research and Interpretation Guides and Choices Architect® For Talent Management and Succession Planning.

About the course

Our approach to certification programmes is to provide an interactive environment that enables participants to bring their own experiences around the topic areas. The workshop will also spend time on how to implement the tools with a particular focus on building on-going capability.

The programme will enable participants to:

- Understand the research behind the Lominger competencies including career progression & derailment and learning from experience
- Use the Leadership Architect® Competency Sort Cards to develop success profiles
- Understand how success profiles help drive organisational success
- Assess and prioritise development needs based on the gap between a success profile and an individual assessment
- Use the Leadership Architect® Competency Sort Cards and FYI For Your Improvement™ book for performance and development conversations
- Assess talent and high potential staff using the Choices® Architect
- Understand best practice talent management and succession planning processes

Certification

To use the products in The LEADERSHIP ARCHITECT® Suite that require certification, you will need to attend a Lominger International Approved Applications Certification Workshop. Agility Consulting via Lominger Associate Andrew Williams, has approval to run Certification Workshops, allowing attendees to be certified to use the products on successful completion.

This course will provide certification to work with the Leadership Architect® Suite and Choices® Architect Suite for Talent Management. Please note, that although there will be some discussion on the Voices® tools for 360° feedback, certification in these products is not included.

Please also note that certification is for individuals, not organisations. Certification remains with the certified individual. That means if you are certified at one company and move to a new company, you may continue to purchase and use the tools for which you were certified.

If you are, or choose to become, an independent consultant, please note restrictions apply if you wish to use these products with client organisations. This will be fully explained at the workshop. If you wish to know more before the workshop, please contact the workshop organisers.

Facilitators

The workshop will be facilitated by Andrew Williams Director Agility Consulting and Lominger Associate, assisted by Diane Edwards Director and Senior Consultant of Zuri Consulting Limited.

Location

The workshop will be held in Wellington, New Zealand on 31 August – 1 Sept 2009, at a location to be advised.
